## What is MZN?

**MZN (Medizyne Zonder Name)** is a health supplement that supports, boost and strengthens the immune system. It was primarily developed as a supplement to support Cancer patients undergoing Radio- and Chemotherapy. As matters progressed, it was found to assist in relieving the symptoms of other ailments, reducing Cholesterol, stabilizing blood glucose, boosting the immune system of persons with HIV/AIDS and Covid, amongst others.

The product is a **cream coloured paste** which binds the actives in the product. It has an extremely sweet taste that originates from the *Stevia plant* which is used as an antioxidant.

**Ingredients** include herbs such as ginger, black pepper, nutmeg, stevia, arnica, roibos tea, plant sterols and primrose oil.

### MZN (PASTE)

(Class: Phyto supplement for humans; consists of plantmaterial only)

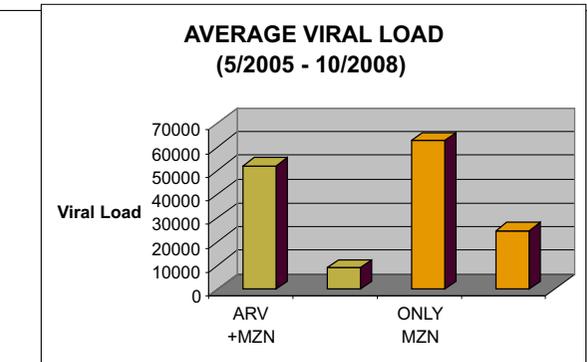

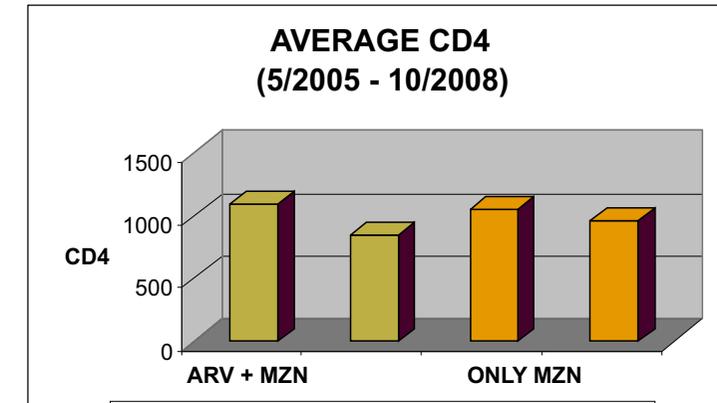

### COMPOSITION (%m/m)

COMPOSITION (%m/m)		mg/kg
Protein	1,25	14,20
Fibre	2,54	6,73
Fat	94,80	23,70
Moisture	1,02	33,60
Carbohydrates	<0,50	5,04
Glucose	117kJ	0,35
Energy		1,13
		1,13
		<0,20
		0,24
		<0,20
		<1,0
		18 mg Retinol/100g
		60 IU/100g
		Primarisien 10mg/kg

In process of registration as health supplement at MCC.

## Studies Conducted

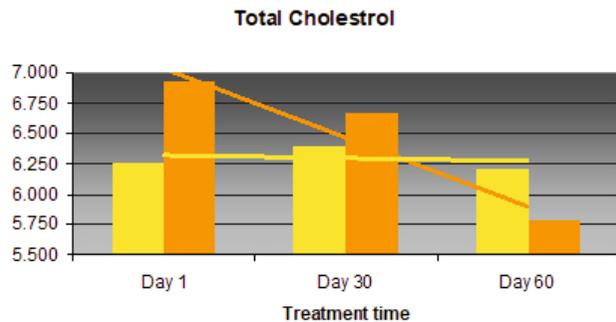

**HIV/AIDS:** MZN was provided to the 'Village of Hope' in Dodoma, Tanzania where it was given to approximately 40 orphan children that are HIV positive. MZN was given in combination with anti-retroviral medicine and the children's viral load and CD4 counts were monitored over time by the Hospital of Rome. In the figure below, a decrease in the CD4 (white cell count) can be seen with only MZN and a slight increase with ARV and MZN in combination. However the average white cell count with only MZN alone is more than in the case with the combination. The trend that will initially happen is that when the viral load goes down there will be a decrease in the CD4 because of the white cells dying off when fighting the virus.

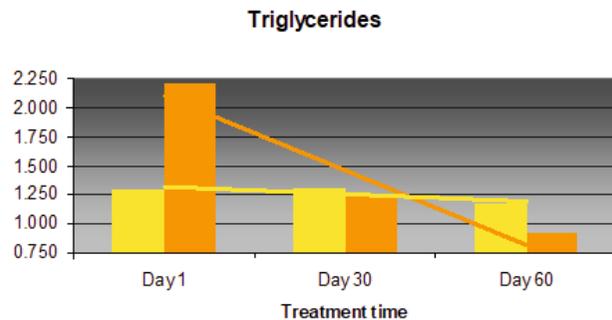

# Studies Conducted

**Cholesterol:** The study was conducted by Prof P.E. Kruger from the Institute for Sport Research at the University of Pretoria. There was a statistically significant decline in the total Cholesterol scores from the onset of the experiment at day 0 until the third month. This decline seemed to be steady from one month to the next with significant decreases from month to month.

There was also a significant decline in the Triglyceride scores. The largest differences occurred between the onset of the experiment at day 0 and after 1 month. Secondly, another significant decline occurred between 1 and 2 months.

**Diabetes:** MZN was given to 14 diabetic patients over a 6 week period and their blood glucose values were monitored. The results can be seen in the graph below. MZN has a definite stabilizing effect on blood glucose levels. Aside from the benefit to the patient, the secondary benefit is in an increase of approximately 20% to 25% in productivity due to the neutralisation of the feeling of 'lethargy' brought about by fluctuating blood glucose levels.

**Liver Function:** Below is the data (enzyme profiles) obtained from a patient with liver cirrhosis:

Date Count	Minimum	Maximum	1	2	3	4	5	6
			16/07/04	19/07/04	26/07/04	23/08/04	27/08/04	22/10/04
Billirubin Total	0	21	212	180	196	202	82	35
Billirubin Con.	0	6	94	78	82	83	25	11
Total Protein	60	85	70	59	62	58	69	62
Albumin	35	52	32	27	25	27	33	26
Alk. Phos.	40	120	211	153	129	152	112	85
Y. Gluten Trans.	0	60	1109	652	277	398	104	37
ALT	5	40	32	23	23	21	24	27
AST	5	40	166	96	104	97		56

## Testimonials:

**“Myself and 5 in-contact-persons were in contact with a person that tested positive for the Corona virus. All six of us used MZN and no one was infected.” J.G. du Toit, 2020**

**“There was a significant change in my bone density which stunned the doctor. He wanted to know what I had taken or done since my last scan, as it shows the density similar to a 35 year old (I am 55!).” Ina Beukes, Osteoporosis**

**Miss Dagmar Ham was diagnosed with a brain tumor in May 2005. It was not malicious or aggressive. She started using MZN immediately and in December 2005, after 6 weeks of radiation therapy and using MZN, the growth of the tumor was stopped in its tracks!**
